Dataset:

Age	Income	Gender	City
20	25000	Male	Dhaka
25	30000	Female	Chittagong
NaN	35000	Male	Dhaka
30	NaN	Female	Sylhet
28	40000	NaN	Dhaka
35	45000	Male	NaN

Lab Task: Data Preprocessing

Total Marks: 15

Using a dataset containing **Age, Salary, Gender, and City**, perform the following:

1. **Imputation – 5 marks**
   - Identify missing values.
   - Replace numerical missing values with the **mean**.
   - Replace categorical missing values with the **mode**.
2. **Scaling – 5 marks**
   - Apply **Min-Max Scaling** to Age and Salary.
3. **Encoding – 5 marks**
   - Apply **Label Encoding** to Gender.
   - Apply **One-Hot Encoding** to City.

Output: Display the dataset before and after preprocessing.
